Coding table

How to read the code column.

Application area. Q7 settles the application area on its own, as a gate. When Q7 is not answered, both columns stay open and a ranking is given for each, and the contingency factors (Q10 to Q13) are not asked.

Governance mode. The **reported arrangement** is the average of the codes of Q21 and Q22 that were answered: below 0 it places the project at the centralized mode, above 0 at the federated mode. Only when it is 0, or Q21 and Q22 are both unanswered, the **contingency fit** decides: the average of the codes of Q10 to Q13 that were answered, read the same way. If that is also 0 or unanswered, both modes stay open and a ranking is given for each, with the unanswered questions that would settle it. Across organizations, Q10 to Q13 are asked about the participating organizations together.

Ranking. First the approach with the project's application area and governance mode; second the same application area with the other mode; third the other application area with the same mode; last the other application area with the other mode.

Mixed answers. The result says so when Q21 and Q22 have opposite signs, and when the reported arrangement and the contingency fit have opposite signs.

An answer marked *descriptive* characterizes the project without moving it. Every question also offers "I am not sure / not decided yet"; it counts as unanswered and is listed only where it changes something.

QUESTION	ANSWER	AXIS	CODE
Q1 Domain	Process, product, environment, customer, metadata (any)	none	descriptive
Q2 Maturity of processing	Raw, modified, enriched, processed (any)	none	descriptive
Q3 Source	Generated, acquired, customer provided, freely available (any)	none	descriptive
Q4 Privacy	Public, internal, confidential, sensitive (any)	none	descriptive
Q5 Timeframe	Static, up to date, (near) real time (any)	none	descriptive
Q6 Motivation	Economic, social and environmental, legal, cultural (any)	none	descriptive
Q7 Scope (the gate)	Intra-organizational	Application area	**within one organization**
	Same industry, or cross-industry		**across organizations**
	Not sure / not decided yet, or left empty		both columns stay open, and a ranking is given for each; Q7 is named as the question that would settle it

QUESTION	ANSWER	AXIS	CODE
Q8 Reward	Money, virtual assets, data, service, reputation, none (any)	none	descriptive
Q9 Payment model	Free, fixed, subscription based, usage based, revenue based, hybrid (any)	none	descriptive
Q10 Performance strategy	Profit	Governance mode (only if Q21 and Q22 leave it open)	**−1**
	Asset utilization		**0**
	Growth		**+1**
Q11 Organization structure	Centralized	Governance mode (only if Q21 and Q22 leave it open)	**−1**
	Decentralized		**+1**
Q12 Degree of process harmonization	Globally harmonized	Governance mode (only if Q21 and Q22 leave it open)	**−1**
	Local processes		**+1**
Q13 Degree of market regulation	Highly regulated	Governance mode (only if Q21 and Q22 leave it open)	**−1**
	Little or no regulation		**+1**
Q14 Technical architecture	Peer to peer, platform based (any)	none	descriptive
Q15 Data storage	Centralized, distributed, hybrid (any)	none	descriptive
Q16 Interoperability	Legal, organizational, semantic, technical (any)	none	descriptive
Q17 Access coordination	Agreement based, application based, trust based, open (any)	none	descriptive
Q18 Provision request	On demand, event based, continuous (any)	none	descriptive
Q19 Type of relationship	One to one, one to many, many to one, many to many (any)	none	descriptive
Q20 Actor interdependence	Loosely coupled, tightly coupled (any)	none	descriptive

QUESTION	ANSWER	AXIS	CODE
Q21 Data control	Yes: the provider sets conditions (sovereign)	Governance mode	**+1**
	No conditions at all (shared)		**0**
	No, the receiver decides (transferred)		**−1**
Q22 Allocation of decision-making authority	Each party, for its own data (decentral units)	Governance mode	**+1**
	Each party, within common rules set by someone else (both)		**0**
	One party, for all the data (central unit)		**−1**
Q23 Coordination of decision-making	Hierarchical, cooperative (any)	none	descriptive
